

Yuting Wei

Statistics & Data Science
307 Academic Research Building
The Wharton School, University of Pennsylvania

Email: ytwei@wharton.upenn.edu
Homepage: <https://yutingwei.github.io/>

Employment

University of Pennsylvania

Assistant Professor, Department of Statistics and Data Science, The Wharton School, 07/2021 - present

Carnegie Mellon University

Assistant Professor, Department of Statistics and Data Science, 08/2019 - 06/2021

Stanford University

Stein Fellow/Lecturer, Department of Statistics, 09/2018 - 07/2019

Education

University of California, Berkeley Ph.D. in Statistics, 2013 - 2018

- Thesis: A geometric perspective on some topics in statistical learning
- Advisor: Martin Wainwright, Adityanand Guntuboyina

Peking University Bachelor of Science (B.S.) Applied Mathematics, 2009 - 2013

- Advisor: Jinzhu Jia, Peking University

Peking University Bachelor of Arts (B.A.) Economics, 2010 - 2013

Short-term appointments

Simons Institute for the Theory of Computing, University of California, Berkeley

Visiting scientist, 08/2021 - 12/2021

Institute for Mathematical Research (FIM), ETH Zürich

Visiting researcher, 09/2015 - 12/2015

Department of Mathematics, City University of Hong Kong

Visiting researcher, 08/2012 - 11/2012

Research interests

- High-dimensional and nonparametric statistics
- Shape-constrained inference
- Reinforcement learning
- Applications in bioinformatics and statistical genomics

Honors & awards

NSF CAREER Award, 2022
INFORMS George Nicholson Award, Finalist, 2021
Stein Fellowship, Stanford University, 2019
Erich L. Lehmann Citation, University of California, Berkeley, 2018
Oberwolfach Leibniz Graduate Student Grant, 2017
Berkeley Graduate Student Travel Grant, 2017
Outstanding Graduate of Peking University, 2013
Outstanding Winner of Annual Peking University Research Competition (top 10/5000), 2013
Best Overall Winner in 2nd Machine Learning Competition in Immunology, 2012
President Research Fund, Peking University, 2011-2012

Journal articles & preprints

- J1. Gen Li, **Yuting Wei**, “A non-asymptotic framework for approximate message passing in spiked models,” arxiv:2208.03313, 2022.

Short courses and tutorials

- S1. “Reinforcement Learning: Fundamentals, Algorithms, and Theory”, *International Conference on Acoustics, Speech and Signal Processing (ICASSP) 2022*, cotaught with Yuejie Chi and Yuxin Chen, May. 2022.
- S2. “Statistical and Algorithmic Foundations of Reinforcement Learning,” *ICSA 2021 Applied Statistics Symposium Short Course*, cotaught with Yuejie Chi, Yuxin Chen and Zhengyuan Zhou, Sep. 2021.

Invited talks

- T1. “A non-asymptotic framework for approximate message passing in spiked models,” *Simons Institute, UC Berkeley*, Dec. 2022.
- T2. “A non-asymptotic framework for approximate message passing in spiked models,” *Computational and Methodological Statistics, London*, Dec. 2022.
- T3. “A non-asymptotic framework for approximate message passing in spiked models,” *IMS International Conference on Statistics and Data Science (ICSIDS), Florence, Italy*, Dec. 2022.
- T4. “Modern perspectives in high dimensional statistics: two recent stories,” *Statistics Seminar, Wuhan University*, Nov. 2022.
- T5. “On the effectiveness and ineffectiveness of policy optimization,” *Hong Kong University of Science and Technology*, Oct. 2022.
- T6. “Settling the sample complexity of model-based offline reinforcement learning,” *Informa Annual Meeting, Indianapolis*, Oct. 2022.
- T7. “Settling the sample complexity of model-based offline reinforcement learning,” *Asilomar Conference on Signals, Systems, and Computers*, Oct. 2022.
- T8. “A non-asymptotic framework for approximate message passing in spiked models,” *SIAM Conference on Mathematics of Data Science (MDS22), San Diego*, Sep. 2022.
- T9. “A non-asymptotic framework for approximate message passing in spiked models,” *Probability Seminar, UC Davis*, Sep. 2022.
- T10. “Beyond $o(\log n / \log \log n)$ iterations: A non-asymptotic framework for approximate message passing in spiked models,” *Joint Statistical Meetings, Washington, D.C.*, Aug. 2022.
- T11. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *Bernoulli Young Researchers Workshop*, virtual, Jul. 2022.
- T12. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *ICSA China Conference*, virtual, Jul. 2022.
- T13. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *Youth in High-Dimensions:*

Recent Progress in Machine Learning, High-Dimensional Statistics and Inference, Jun. 2022.

- T14. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *International Conference on Econometrics and Statistics (EcoSta)*, Jun. 2022.
- T15. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *New Advances in Statistics and Data Science, Hawaii*, May. 2022.
- T16. “Beyond $o(\log n / \log \log n)$ Iterations: Non-asymptotic Analysis for Approximate Message Passing,” *ICMS workshop, Edinburgh*, May. 2022.
- T17. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *Statistics Seminar, Cambridge University*, May. 2022.
- T18. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *Probabilistic Seminar, Harvard University*, Mar. 2022.
- T19. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *52nd Annual Conference on Information Systems and Sciences (CISS) conference, Princeton*, Mar. 2022.
- T20. “Exponential lower bounds and fast convergence for policy optimization,” *Martin Wainwright’s group, UC Berkeley*, Nov. 2021.
- T21. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *Workshop on Seeking Low Dimensionality in Deep Neural Networks (SLOWDNN)*, Nov. 2021.
- T22. “Breaking the sample size barrier in reinforcement learning,” *Stochastics and Statistics Seminar, MIT*, Oct. 2021.
- T23. “Bridge over troubled water: Lower bounds and fast convergence for policy optimization,” *Informa Annual Meeting*, Oct. 2021.
- T24. “Minimum ℓ_1 -norm interpolators: Precise asymptotics and multiple descent,” *Peter Bartlett’s group, UC Berkeley*, Oct. 2021.
- T25. “Sample complexity of Q-learning: Sharper analysis and minimax optimality,” *ICSA 2021 Symposium*, Sep. 2021.
- T26. “Breaking the sample size barrier in reinforcement learning,” *Statistics Seminar, Duke University*, Sep. 2021.
- T27. “Breaking the sample size barrier in reinforcement learning,” *Joint Statistical Meetings (JSM)*, Aug. 2021.
- T28. “Softmax policy gradient methods can take exponential time to converge,” *Conference on Learning Theory (COLT)*, Aug. 2021.
- T29. “Statistical Inference over Convex Cones,” *SIAM Conference on Optimization*, July. 2021.
- T30. “Modern statistical perspectives in reinforcement learning and early stopping,” *Statistics Seminar, Harvard University*, Feb. 2021.
- T31. “Breaking the sample size barrier in reinforcement learning,” *Statistics Seminar, Wharton Statistics Seminar, University of Pennsylvania*, Feb. 2021.
- T32. “Modern Statistical Perspectives in Reinforcement Learning and Early Stopping,” *Statistics Seminar, Department of Data Sciences and Operations, University of Southern California*, Feb. 2021.
- T33. “Breaking the Curse of Dimensionality: From Sparse Regression to Kernel Boosting,” *Statistics Seminar, Stern School of Business, New York University*, Jan. 2021.
- T34. “Breaking the sample size barrier in reinforcement learning,” *Statistics Seminar, Yale University*, Jan. 2021.
- T35. “Breaking the Sample Size Barrier in Statistical Inference and Reinforcement Learning,” *Wilks Statistics Seminar, ORFE, Princeton University*, Dec. 2020.
- T36. “Breaking the Sample Size Barrier in Statistical Inference and Reinforcement Learning,” *Statistics Seminar, Rutgers University*, Dec. 2020.

- T37. “Breaking the sample size barrier in model-based reinforcement learning with a generative model,” *Inform's Annual Meeting*, Nov. 2020.
- T38. “Breaking the sample size barrier in model-based reinforcement learning with a generative model,” *Richard Samworth's group, Cambridge University*, Nov. 2020.
- T39. “Reliable hypothesis testing paradigms in high dimensions,” *Columbia University, Statistics Seminar*, Oct. 2020.
- T40. “Reliable hypothesis testing paradigms in high dimensions,” *Young Data Science Researcher Seminar Zurich, ETH*, Oct. 2020.
- T41. “Reliable hypothesis testing paradigms in high dimensions” *Michigan State University, Statistics Seminar*, Oct. 2020.
- T42. “The Lasso with general Gaussian design with application to hypothesis testing,” *Joint Statistical Meeting*, Aug. 2020.
- T43. “Breaking the sample size barrier in model-based reinforcement learning with a generative model,” *TBSI Workshop on Learning Theory, Shenzhen*, Jul. 2020.
- T44. “Understanding the distribution of the Lasso and its applications,” *STATML Group, Carnegie Mellon University*, Mar. 2020.
- T45. “A geometric perspective on hypothesis testing,” *ICSA International Conference, Hangzhou, China*, Dec. 2019.
- T46. “Towards a better understanding of the regularization in kernel learning,” *TBSI Workshop on Learning Theory, Shenzhen*, Dec. 2019.
- T47. “Towards a better understanding of the regularization in kernel learning,” *Statistics Seminar, Cambridge University*, Nov. 2018.
- T48. “Towards a better understanding of the regularization in kernel learning,” *Big Data and Computational Social Science Lecture, University of British Columbia*, Mar. 2019.
- T49. “Early stopping for gradient type algorithms,” *Computational and Methodological Statistics, University of Pisa, Italy*, Dec. 2018.
- T50. “The geometry of hypothesis testing over convex cones,” *52nd Annual Conference on Information Systems and Sciences (CISS) conference, Princeton*, Mar. 2018.
- T51. “Geometric analysis of hypothesis testing and early stopping for boosting,” *Statistics Seminar, Carnegie Mellon University*, 2018.
- T52. “Geometric analysis of hypothesis testing and early stopping for boosting,” *Statistics Seminar, Stanford University*, 2018.
- T53. “Geometric analysis of hypothesis testing and early stopping for boosting,” *Statistics Seminar, University of Michigan*, 2018.
- T54. “Geometric analysis of hypothesis testing and early stopping for boosting,” *Statistics Seminar, University of Pennsylvania*, 2018.
- T55. “Shape-constrained methods: Inference, applications, and practice,” *Banff International Research Station for Mathematical Innovation and Discovery (BIRS), Canada*, 2018.
- T56. “Early stopping for kernel boosting algorithms,” *Neural Information Processing Systems (NIPS) conference, Long Beach*, 2017.
- T57. Student talk for Oberwolfach Workshop “Statistical Recovery of Discrete, Geometric and Invariant Structures”, 2017.
- T58. “Sharp minimax bounds for testing discrete monotone distributions,” *International Symposium on Information Theory (ISIT) conference, Barcelona*, 2016.
- T59. “Adaptive estimation of planar convex sets,” *Berkeley Statistics Annual Research Symposium (BSTARS)*,

2016.

T60. “Sharp minimax bounds for testing discrete monotone distributions.” *Stanford-Berkeley Joint Colloquium*, 2016.

Current Ph.D. students and postdocs

1. Weichen Wu (Ph.D., co-advised with Alessandro Rinaldo)
2. Hong Hu (Postdoc, co-advised with Yuxin Chen)
3. Gen Li (Postdoc, co-advised with Yuxin Chen)

Graduated Ph.D. students

1. Yue Li (Ph.D. 2022, co-advised with Kathryn Roeder)
2. Minshi Peng (Ph.D. 2021, co-advised with Kathryn Roeder)

Doctoral committees

Chen Dan (CMU, Computer Science), Pratik Patil (CMU, Statistics & Machine Learning), Yufei Yi (CMU, Statistics)

Teaching

University of Pennsylvania:

- STAT 9910-302: Mathematical Foundations of Reinforcement Learning, Spring 2023
- STAT430: Probability, Spring 2022

Carnegie Mellon University:

- 36-747: Mathematics for High Dimensional Data: A statistical viewpoint, Spring 2021
- 36-748: Mathematics for High Dimensional Data: An optimization viewpoint, Spring 2021
- 36-225: Introduction to Probability, Fall 2020
- 36-741: Statistics meets Optimization: Iterative sketching methods, Fall 2019
- 36-742: Statistics meets Optimization: Approximate message passing algorithms, Fall 2019

Stanford University:

- Statistics 314: Advanced Statistical Theory, Spring 2019
- Statistics 206: Applied Multivariate Statistical Analysis, Winter 2018

University and department service

Statistics departmental postdoc selection committee, 2021 - 2022

Admission committee at UPenn statistics, 2021 - 2022

Statistics department seminar co-organizer at CMU, 2020 - 2021

Faculty senate member at CMU, 2020 - 2021

Statistics department seminar co-organizer at CMU, 2019 - 2020

Faculty senate member at CMU, 2019 - 2020

Statistics department seminar co-organizer at Stanford, 2018 - 2019

Selected professional service

Grant reviewer: National Science Foundation

Reviewer for journals: Annals of Statistics, Journal of Machine Learning Research, Journal of the American Statistical Association, Biometrika, IEEE Transactions on Information Theory, Statistica Sinica, Electronic Journal of Statistics, Operations Research, SIAM Journal on Mathematics of Data Science, Journal of the Korean Statistical Society

Reviewer for conferences: International Conference on Artificial Intelligence and Statistics (AISTATS), IEEE International Symposium on Information Theory (ISIT), Conference on Neural Information Processing Systems (NeurIPS), International Conference on Machine Learning (ICML), Annual Conference on Learning Theory (COLT), Asian Conference on Machine Learning (ACML)

Conferences and workshop organization

Co-organizer of the Oberwolfach Mini-workshop: Mathematical Foundations of Robust and Generalizable Learning, Germany, Oct 2022

Session chair for 2022 INFORMS Annual Meeting, Indiana, Oct 2022.

Session chair for 56th Conference for Information Sciences and Systems (CISS), Princeton, Mar 2022.

Co-organizer for the AI panel of 2021 U8 World Innovation Summit, Sep 2021.
